

# ArtroSan® forte

Nutrient concentrate to maintain healthy joint metabolism

## Feed supplement for dogs

As a structural protein, **collagen** predominantly consists of the amino acids glycine, proline and hydroxyproline, which the body's own metabolism needs as building blocks for stable tendons, ligaments, connective tissue and cartilage.

**Glucosamine glucans (GAGs), chondroitin sulphate, glucosamine and hyaluronic acid** are important substances able to hold large quantities of water, which allow elasticity in the cartilage.

**Devil's claw** supports the body's own regulatory processes.

**Olibanum (frankincense)** provides valuable bioflavonoids.

**Green-lipped mussel** is rich in omega fatty acids, trace elements (zinc, copper, manganese), natural anti-oxidants, vitamin E and organic silicon oxide.

**Omega 3 fatty acids** support the joint metabolism.

**Field horsetail** has a high amount of organically bound silicon, which is required for the elasticity and resistance of collagen fibres.

**Exercise and an optimum supply of nutrients with good digestion are essential for maintaining healthy cartilage substance and joint function.**

**ArtroSan® forte** contains nutrients particularly required in the metabolism of cartilage, tendons, ligaments and joint surfaces, thereby supports healthy joint function.

**ArtroSan forte®** is particularly suitable

- for dogs with limited mobility
- for older dogs with signs of wear on the cartilage, tendons and ligaments
- for dogs with heavy workloads, e.g. competitions

**Composition:**

Hydrolysed collagen (pork) 50%, yeast products, glucosamine (chitosamine) from fermentation 8%, aquatic invertebrates (green-lipped mussel) 7%, methylsulphonylmethane (MSM) 5%, fish oil, chondroitin sulphate 2.5%, field horsetail 2%, dried carrots, hyaluronic acid 1%, olibanum 0.8%, devil's claw 0.5%, vegetable oils and fats [*Carthamus Tinctorius L.*, *Linum usitatissimum L.*, refined]

**Analytical components:**

|                     |       |             |       |
|---------------------|-------|-------------|-------|
| Crude protein       | 64.5% | Crude fibre | 1.0%  |
| Crude fat           | 0.7%  | Crude ash   | 6.6%  |
| NfE IDM             | 13.5% | Moisture    | 11.8% |
| Calcium             | 0.2%  | Phosphorus  | 0.3%  |
| Magnesium           | 0.1%  | Sodium      | 0.4%  |
| EPA                 | 0.34% | DHA         | 0.26% |
| Omega 3 fatty acids | 3.3%  |             |       |

**Feeding recommendation:**

To be administered daily with food. At a weight of

- 10 kg: ½ Measuring spoon (5 g)
- 20 kg: 1 Measuring spoon (10 g)
- 30 kg: 1½ Measuring spoon (15 g)
- 40 kg: 2 Measuring spoon (20 g)

1 level measuring spoon contains 10 g **ArtroSan® forte**.

**Recommended period of use:**

Initially for up to 3 months. It is recommended that advice from a vet be sought before use or before extending the period of use.

**Notes:** Store in sealed packaging in a dry place and not above 25°C. Use within 3 months once opened  
Fresh water should always be freely available.

Fill level due to technical reasons.

**Available at your veterinary practice**

**Durability:** 24 months

**Trading form:**

- 220 g can
- 500 g can
