

Dia Tab® PRO

Dietary supplements for dogs and cats

Chewable tablets for stabilizing physiological digestion

PRÄ-/
PROBIOTIKUM

Enterococcus faecium is a probiotic lactic acid-producing bacterium that contributes to the stabilization of the intestinal flora as a living microorganism.

Prebiotic fructo-oligosaccharides and locust bean gum serve as nutrients for the growth of beneficial microorganisms in the intestine, thereby helping to maintain healthy intestinal flora.

Bentonite is a clay mineral with strong swelling properties and high water retention capacity.

A healthy intestinal flora has been proven to be responsible not only for intestinal health itself, but also for a well-functioning immune system. If the intestinal flora is thrown out of balance, pathogenic germs can multiply and digestive disorders such as diarrhoea or flatulence can occur. Antibiotic treatment can also have a negative effect on the intestinal flora.

Dia Tab® PRO restores balance to the intestinal flora, protects the intestinal mucosa, stabilizes digestion and can thus support the immune system. The chewable tablets can also be used to rebuild the intestinal flora after antibiotic treatment.

Key nutritional characteristics: Feed additives belonging to the functional group 'Intestinal flora stabilisers'.

Composition:

Yeasts, minerals, meat and animal by-products, vegetable by-products (carob flour 3.4%), fructo-oligosaccharides 1%

Analytical Constituents:

Crude protein	15,5 %	Crude fiber	0,4 %
Crude fat	1,2 %	Crude ash	51,5 %

Additives per kg:

Technological additives:

Bentonite 380.000 mg

Intestinal flora stabilisator:

Enterococcus faecium NICMB 10415 5,5 x 10¹¹ KBE

Feeding recommendation:

In case of risk of, during and after digestive disorders.

Weight table

Up to	5 kg	2 x daily	½ Tablet
From	> 5 - 15 kg	2 x daily	1 Tablet
From	> 15 - 25 kg	2 x daily	2 Tablets
From	> 25 - 40 kg	2 x daily	3 Tablets
Over	40 kg	2 x daily	4 Tablets

Recommended feeding period:

Up to 4 weeks. Extending the feeding period is safe. It is recommended to seek the advice of a vet before feeding or extending the feeding period. The administration can be repeated. **Dia Tab® PRO** should only be fed up to 5.2% of the daily ration due to its high bentonite content.

Dia Tab® PRO darf wegen des erhöhten Gehaltes an Bentonit nur bis zu 5,2 % der Tagesration verfüttert werden.

Notice:

The simultaneous oral administration of macrolides should be avoided.

Store in a dry place at a temperature not exceeding 25 °C!

Shelf life: 24 Monate

Packaging:

100 g Can with app. 50 Tablets à 2 g
