

EpiSqualan®

Ear cleaner for dogs and cats

Cerumenolytic ear cleaner with squalane

Squalane

- Has a very good cerumenolytic effect
- Is non-ototoxic unlike most other cerumenolytic substances
- Nourishes and replenishes the skin
- Has no negative effect on the natural skin flora

EpiSqualan® is a very gentle ear cleaner that effectively dissolves earwax and also nourishes the skin. Even very tough, dry earwax is dissolved, whilst at the same time the underlying skin is made soft and supple again.

EpiSqualan® is particularly suitable for ear cleaning with heavy earwax formation and ceruminolysis prior to ear irrigation. **EpiSqualan®** contains no ototoxic ingredients.

Composition:

Squalane, Arachis Hypogaea Oil, Caprylic / Capric Triglyceride, Vitamin E

Directions:

Apply drops of **EpiSqualan®** in the outer ear canal and gently massage the base of the ear in order to dissolve and soften earwax. Gently remove any discharged material using a cotton ball or gauze. Gently dry the outer area of the ear canal and auricle. Repeat cleaning if required.

Notes:

For external use only. Avoid contact with eyes. In case of contact with eyes, rinse immediately with abundant water.

If the eardrum is not visible, the vet should decide whether physiological saline solution or EpiSqualan® (applied in drops) should be used to clean the abnormally soiled external ear canals.

Store in a dry place, away from light and not above 25°C.

Durability: 24 months

Trading form:

50 ml and 100 ml plastic bottle

With soft rubber applicator for ease of use

Practical tip

If ear irrigation under sedation is not desired despite ears being heavily clogged with wax, daily application of EpiSqualan for 5 days can remove earwax and other organic material from the ears.
