

FeliGum® Dia

Feed supplement for cats

With bentonite and pectin

Pectins have a strong swelling capacity and an exceptionally high water-binding ability.

Galacto-oligosaccharides and pectins serve as nutrients for beneficial microorganisms in the intestine, thereby supporting the maintenance of a healthy gut flora.

Blueberries and **blackberry leaves** provide valuable secondary plant compounds.

FeliGum® Dia also contains **bentonite**.

Composition:

Meat and animal by-products, milk and dairy products [galacto-oligosaccharides 5 %], sorbitol, glycerine, vegetable by-products [pectin 6.7 %, dried blackberry leaves 0.5 %, blueberries 0.5 %], minerals, yeasts, oils and fats.

Analytical components:

Crude protein	15.3 %	Crude fibre	< 0.3 %
Crude fat	6.8 %	Crude ash	15.6 %
Moisture	21.3 %		

Additives per kg:

Technological additives:

Bentonite	100,000 mg
-----------	------------

Antioxidants, preservatives

Feeding recommendation:

Administer directly or mixed with food.

Cats	up to 3 kg	2 x daily	1 chewable drop
Cats	over 3 kg	2 x daily	2 chewable drops

If necessary, the amount given can be increased.

During administration of FeliGum® Dia, plenty of fresh water should be available at all times.

Notes:

FeliGum® Dia may only be fed up to 20 % of the daily ration due to its elevated bentonite content. The simultaneous oral administration of macrolides should be avoided.

Store in a dry place and do not exceed 25°C. Reseal pouch tightly after use.

Shelf life: 24 months

Commercial size and packaging:

40 g pouch
contains approx. 20 highly palatable chewable drops.
