

FeliGum® Hairball

Food supplement for cats

With psyllium husks

Cats are very hygienic animals and highly devoted to grooming. They use their spiked tongue to both clean their fur and ingest hair and dirt. Swallowed hairs are excreted undigested or vomited.

However, in some cases agglomerations of hair can form in the stomach, which cannot be excreted naturally.

FeliGum® Hairball encourages the elimination of hair and hairballs found in the gastrointestinal tract.

Composition:

Meat and animal by-products, sorbitol, plant by-products (psyllium husks 3.8%), glycerin, oils and fats, minerals, yeasts

Analytische Bestandteile:

Crude protein	31.8 %	Crude fibre	< 0.3 %
