

ReConvaless® Cardio

Complementary feed for cats and small dogs

To supplement the diet with taurine, carnitine and omega-3 fatty acids

Taurine is an amino sulfonic acid essential for cats, which must be consumed in sufficient amounts, particularly for a well-functioning heart.

Omega-3 fatty acids are high-quality lipids with numerous important functions. Since the body cannot produce them, they must be obtained from the diet.

L-Carnitine plays an important role in energy metabolism.

Hawthorn provides valuable secondary plant compounds.

ReConvaless® Cardio supplements the diet with taurine and L-carnitine in high concentration as well as with omega-3 fatty acids and hawthorn. In addition, **ReConvaless® Cardio** provides fluid, vitamins and trace elements and is exceptionally palatable.

Composition:

Vegetable by-products (hawthorn 1%), meat and animal by-products, oils and fats, minerals, sugar

Analytical constituents:

Crude protein	9.1%	Crude fat	5.1%
Crude fibre	0.8%	Crude ash	1.1%
