

RodiCare® Päppelpaste

Feed supplement for rabbits
and guinea pigs

Status 08/25

The RodiCare® Päppelpaste is a gruel-like complementary feed designed for short-term support of rabbits and guinea pigs. The paste ensures rapid delivery of essential nutrients and helps maintain normal gastrointestinal motility. In addition, the formulation helps stimulate appetite.

The product is ready to use and can be administered directly without prior mixing. It comes in two convenient 30-ml syringes that allow precise, hygienic, and easy feeding. Its excellent palatability further facilitates administration.

Composition:

Glycerine, alpine grass meal, soya bean shells, linseed cake, oat bran, wheat germ, fennel seeds, mint, caraway seeds, pectin, sodium chloride, rapeseed oil, fenugreek seeds, liquorice, curcuma, sweet flag root, dried camomile flowers, fructo-oligosaccharides

Analytical components:

Crude protein 2.5%, crude fat 0.9%, crude fibre 2.9%, crude ash 8.6%, calcium 0.26%, phosphorous 0.07%, sodium 0.23%, magnesium 0.15%, lysine 0.12%, methionine 0.05%, moisture 54.4%, NfE 30.7%

Additives per 1000 ml:

Nutritional physiological additives: Vitamin A (3a672a) 1,780 I.U., Vitamin D3 (3a671) 119 I.U., Vitamin E (3a700) 5.9 mg, Vitamin C (3a300) 1,480 mg, Vitamin K3 (3a711) 300 µg, Vitamin B1 (3a821) 220 µg, Vitamin B2 (3a825ii) 600 µg, Vitamin B6 (3a831) 600 µg, Vitamin B12 (3a837) 4.4 µg, Niacin (3a315) 3.0 mg, Calcium D-pantothenate (3a841) 2.0 mg, Choline chloride (3a890) 44.5 mg, Iron as ferrous sulphate monohydrate (3b103) 7.4 mg, Manganese as manganese (II) oxide (3b502) 5.9 mg, Zinc as zinc oxide (3b603) 8.9 mg, Copper as copper(II) sulphate pentahydrate (3b405) 1.9 mg, Iodine as calcium iodate, anhydrous (3b202) 140 µg, Selenium as sodium selenite (3b801) 30 µg, Cobalt as coated granulated cobalt(II) carbonate (3b304) 60 µg
Technological additives: Bentonite (1m558i) 77,500 mg, potassium sorbate (1k202) 2,500 mg, citric acid (1a330) 2,500 mg

Feeding recommendation:

Apply paste directly into the mouth. Daily weight monitoring is recommended. Do not exceed the recommended daily amount due to the high bentonite content.

Supplement as part of the daily ration:

Give 30 – 60 ml (1 – 2 injectors) per kg body weight daily, plus additional feed (hay, herbs, RodiCare® instant, etc.) to cover the remaining daily requirement. Administer in several small portions of 10 – 20 ml each.

Maximum daily amount per kg body weight: 90 ml

Recommended period of use:

Until the animal is eating sufficiently on its own again, or as advised by your veterinarian.

Notes:

Avoid simultaneous oral administration of macrolides. Before feeding, set the adjusting ring with the left-hand edge to the quantity to be administered to avoid an excessive input quantity. Under no circumstances should the pet be placed on its back during administration, since it can easily choke in this position. If pets do not consume the product of their own accord, carefully place the injector in the side of the mouth and give small portions that the pet can swallow on its own.

Do not use in case of intestinal obstruction. Pets with diarrhoea or constipation must always be taken to a vet, since digestive disorders can have severe consequences.

Use up once opened.

Store away from light and not above 25 °C.

Durability:

24 months

Trading form:

60 ml (2 x 30 ml)
