

UroStruvit Gel

Complementary feed for dogs and cats

2-fold protection for a healthy urinary tract

DL-Methionine is a sulfur-containing amino acid which can acidify the urine.

Cranberry supplements the food with valuable secondary plant compounds.

Composition:

Yeast products, glycerine, vegetable by-products (cranberry 4%)

Analytical constituents:

Crude protein	6.13%
Crude fat	0.83%
Crude fibre	4.87%
Crude ash	0.56%
Moisture	57.84%

Additives per 1000 ml:

Nutritional additives:

DL-Methionine [3c301]	192,000 mg
-----------------------	------------

Technological additives:

Preservatives, stabiliser:

Sodium alginate [1d401]	9,070 mg
-------------------------	----------

Feeding recommendation:

Cats and small dogs

≤ 4 kg:	2 x daily	1 ml
4–10 kg:	2 x daily	2 ml

Dogs

≥ 10 kg:	2 x daily	2–8 ml
----------	-----------	--------

For 5–12 weeks, or until a urine pH between 6.2–6.4 is reached.

With longer administration, the feeding amount can in many cases be halved.

UroStruvit Gel should preferably be given together with or directly after feeding.

Always offer water for free intake.

Do not exceed the feeding recommendation.

Do not use in animals with severe liver or kidney disease. Do not use in animals with metabolic acidosis.

Close the injector tightly after use and keep it out of the reach of children, dogs and cats.

It is recommended to seek the advice of a veterinarian before feeding.

Notes:

2 x 30 ml injectors

1 ml contains 192 mg DL-methionine.

Do not store above 25°C; store in a dry place protected from light.

The mixture of different sources of alginates must not exceed the maximum permitted content in complete feed.

Shelf life: 36 months

Pack size:

2 x 30 ml injector
