

ZymeDent

Enzymatic toothpaste for oral hygiene of dogs and cats

For the regulation of plaque and tartar formation

ZymeDent has been specially developed for animals and consists of a unique enzyme complex for effective dental prophylaxis.

- Removal and prevention of dental plaque
- Counteracting tartar formation
- Prevention of gingivitis
- Active reduction of bad breath

Composition:

Enzyme complex (Lactoferrin, lactoperoxidase, Lysozyme, Isothiocynate salt, Glucose Oxidase), Silicon Mild Abrasive Bead, Zinc Chelate, Poultry Flavour, Preservatives

Application:

Apply 1 – 2 cm of paste, once daily for at least half a minute. Apply a small amount (1 – 2 cm) of toothpaste, depending on the size of the animal, onto a toothbrush that is suitable for animals. Brush the teeth gently from all sides for at least half a minute. Rinsing off the toothpaste residue afterward is not necessary. ZymeDent can be easily swallowed by the animal after brushing. Tooth brushing should be repeated daily unless otherwise instructed by a veterinarian. Close the tube tightly after each use.

Notes:

Please consult your veterinarian for specific dental care advice and treatment for your pet. Store below 25°C, in a dry and light-protected place. For animal use only. Keep out of reach of children. Not for human consumption.

Durability: 36 months

Trading form: 50 ml tube with finger toothbrush
